December 1981

This publication was compiled from 1980 Census Data and printed by the Oklahoma Department of Economic and Community Affairs as authorized by DECA Director Cindy Rambo. 500 copies were produced at a total cost of $3,944. which includes all personnel time and printing costs. 12/31/81

TABLE OF CONTENTS

Introduction ..... 1 - 2

Total Population and Median Age
Stratified by Sex: Counties ..... 3 - 4

Total Population Stratified by Sex
and Age: Counties ..... 5 - 20

Total Population Stratified by Race
and Age: Counties ..... 21 - 36

Total Population and Median Age
Stratified by Sex: Cities ..... 37 - 39

Total Population Stratified by Sex
and Age: Cities ..... 40 - 63

Total Population Stratified by Race
and Age: Cities ..... 64 - 87

The data presented in this report are the revised final counts for Oklahoma cities and counties. The final population for the state, as of April 1, 1980, was 3,025,290. This report presents the 1980 census population counts by age, race, and sex. There are three tables for each level of geography: sex and median age, age cross-classified by sex, and age cross-classified by race. These tables are presented for counties and all cities above 2,500 population.

As of April 1, 1980 there were 1,476,705 men in Oklahoma, 48.81% of the total population and 1,548,585 women, 51.18% of the total population. The median age of all individuals in the state was 30.1 years. This is the age at which half of the individuals are older and half are younger. The median age for men was 28.7 years, while for women the median age was 31.6 years.

For presentation in this report, age has been classified into four broad categories: under 5 years, 5 to 17 years, 18 to 64 years, and 65 years and older. As of the census date, 7.71% of the Oklahoma population was under 5 years of age, 20.55% was between 5 and 17, 59.31% was 18 to 64, and 12.43% was 65 or older.

The race counts of the population are provisional. Final counts by race will be determined after the sample data have been processed. Information on race was obtained through self-identification; therefore, the data represent self-classification by people according to the race with which they identify themselves.

Population counts in this report are shown for four race categories: White, Black, American Indian, and Asian. Counts for other races are contained in the totals, but are not presented separately.

The category "White" includes persons who indicated their race as White, as well as persons who did not classify themselves in one of the specific race categories listed on the questionnaire, but who entered a response suggesting European origin such as German, Italian, or Polish. (In the 1980 census, persons who did not classify themselves in one of the specific race categories, but reported entries such as Cuban, Puerto Rican, or Mexican were included in the "Other" races category. In the 1970 census, most of these persons were included in the "White" category. Therefore, race data is not comparable between censuses.)

The category "Black" includes persons who indicated their race as Black or Negro, as well as persons who did not classify themselves in one of the specific race categories listed on the questionnaire, but who reported entries such as Jamaican, West Indian, or Nigerian.

The category "American Indian" includes persons who classified themselves as such in one of the specific race categories. It also contains persons who reported themselves as Eskimo or Aleut, and those who did not report themselves in one of the specific race categories, but who reported the name of an Indian tribe.

The category "Asian" includes persons who indicated their race as Japanese, Chinese, Filipino, Korean, Asian Indian, Vietnamese, Hawaiian, Guamanian, or Samoan.

As of April 1, 1980, there were in Oklahoma 2,597,791 (85.87%) Whites, 204,651 (6.76%) Blacks, 169,459 (5.60%) American Indians, 17,120 (0.57%) Asians, and 36,269 (1.20%) other races.

In order to maintain the confidentiality promised respondents and required by law, it is necessary for the Census Bureau to make sure that its public data do not disclose information about any individual. Therefore, the Bureau suppresses tabulations of characteristics of very small groups of people.

Several basic counts are never suppressed, even if there is a count of only one. These include total population and counts of persons by race. Characteristics of persons, other than race, are shown only if there are 15 or more persons in the geographic area. When the geographic area being summarized has 15 or more persons, no suppression of population characteristics will occur -- except possibly when tables are cross-classified by race. In this case, the 15 persons criterion is also applied to each race category. In a cross-classification, individual cells of data for specific groups are not suppressed when there are 15 or more persons in the total for that group, unless required by complementary suppression. Complementary suppression is applied to prevent the derivation of suppressed data by subtraction. In this case, a second category is also suppressed to prevent disclosure of information that would violate the confidentiality criteria. Suppressed data are indicated by blanks in these tables.

The tables presented in this report are but three from among the fifty-nine available at this time from the 1980 census. Additionally, this data is available for smaller levels of geography: places below 2,500 population, census tracts and enumeration districts. For additional information call the State Data Center at:
(405) 528-8200.
